Claims

If you feel your dehumidifier is not functioning properly, please take the following steps to ensure any malfunctioning parts are replaced by AprilAire.

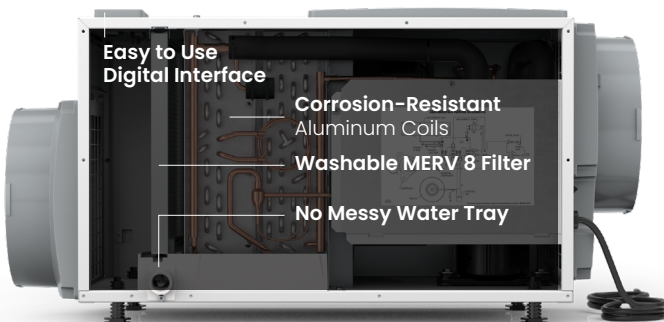

1. Call the installing contractor and explain the issue you are facing with your unit
2. If you are not able to resolve the issue over the phone, have a technician come out and inspect the unit
3. Once inspected, the contractor will troubleshoot and fix the unit, if possible
4. If the unit cannot be fixed, the contractor will supply you with a new unit that is covered by a brand new 5-year warranty

Maintenance

Bi-annual maintenance is a simple way to ensure your dehumidifier continues to perform at the highest level. Every six months, you should perform the following tasks:

- Remove the filter and clean it by spraying it with a garden hose or running it under a faucet
- Clear the drain pan of any excess build-up
- Drop two drain pan cleaning tabs in the drain pan (and the condensate basin if you have one) to clear any blockages or build-up
- To clear the "CLEAN FILTER" message on the digital display, press the up and down arrows simultaneously for three seconds

Please visit AprilAire on YouTube for a step-by-step video on dehumidifier maintenance.

Key Features

AprilAire dehumidifiers provide quality humidity control to make your home a more comfortable and healthier place to live.
